OPPORTUNITIES**

### **About Avis Van Rental**

Avis Van Rental is a licensee owned and managed enterprise, which has grown from humble beginnings to an impressive nationwide network of locations in most major centres. The company's rapid growth can be attributed to a combination of the entrepreneurial approach of the owner/manager philosophy as well as the support of the Avis reservations, billing, marketing and operations systems.

Van Rental now offers a wide range of open and closed vans, bakkies and single and double-cab 4X4 vehicles as well as medium commercial trucks up to 8 ton.

### **More and more SME's are renting**

Small and medium businesses are finding it makes financial sense to rent for extra workloads, replacement vehicles and even those slightly longer rental periods. Choosing this option has a positive effect on cashflow and reduces capital outlay. So when you need a bakkie, van or 4X4 ... let us take the load off your mind.
